Technology Entrepreneurship Bootcamp: diverse teams make strong startups
The University of Exeter hosted its annual, international Technology Entrepreneurship Bootcamp (TEB) from 17 June to 21 June, 2024.

This intensive, interdisciplinary program, led by UC Berkeley faculty Gigi Wang, and run by University of Exeter Department of Engineering's Amber Strong-Yates and Dr Peter Melville-Shreeve, brought together innovative students from around the globe.

The 2024 cohort included participants from renowned institutions such as DTU – Technical University of Denmark, King Danylo University in Ukraine, and Universitas Ciputra Surabaya, Indonesia.

We welcomed Law undergraduate student, Karyna Didukh, from King Danylo University in Ukraine. Karyna made an outstanding contribution to her team, LingoTrainers, dedicated to making learning languages online, fun, accessible and affordable for teens everywhere.

Bootcamp statistics: TEB 2024

- 35 participants
- Students from 4 universities, including University of Exeter, King Danylo University Ukraine, Universitas Ciputra Indonesia and Technical University Denmark (DTU)
- Highly international, the TEB Bootcamp attracted students from over 17 countries (UK, USA, Ukraine, Qatar, UAE, China, Indonesia, India, Sri Lanka, Kenya, Ghana, Portugal, France, Italy, Denmark, Norway, Poland)
- Studying 25 degree courses, everything from 1st year Engineering, MSc Entrepreneurship, to Law, Business Analytics and Genomic Medicine
- 10 entrepreneurial mentors
- 15 guest speakers

What:
- 5 days, intensive, in-person, international and interdisciplinary
- No idea needed to take part, though great if you have one!
- Teams formed on day one – pitch to real investors on day five

So What:
- TEB Bootcamp module is a highly impactful- development experience
- Responsible entrepreneurship for a greener, fairer and healthier world
- Popular, high energy taster for future study at University of Exeter

Exeter's Technology Entrepreneurship Bootcamp is currently made possible by the philanthropic support of Exeter Engineering alumni Adam Boyden.
